Tomorrow's Integrated Information Systems

jUSTIncase Remote Backup Service

One important item on most clients' list is making sure they get a good backup each day. Do you feel confident that your data is getting backed up every night? Would you feel comfortable restoring your **asyst** files from one of your backups if your computer crashed? you can easily get peace of mind that your data is being backed up on your 'Done' list by adding *jUSTIncase* **Remote Backup Service**.

Listed below are a few key reasons why you should consider this service:

-*jUSTIncase* **Remote Backup Service** is software that enables you to back up your critical business information from your server and store that backup information at an offsite storage facility provided by *USTI*.

-Your data is encrypted so that only your organization can view the data on the off site server.

-Your data is backed up automatically on a daily basis at a time that you determine. A daily email is sent to confirm that your data was successful backed up.

-You can access your data on the offsite server at any time 24 hours a day 7 days a week.

-For a little over a dollar a day you can be assured that your data is in a safe place.
