

ALARM BILLING[™]

Tomorrow's Integrated Information System

asyst:Alarm Billing provides an efficient and accurate system for issuing and maintaining Alarm Permits for any number of different types issued by your organization. It also provides automatic billing for alarms that exceed the number of "free" false alarms for any permitted alarm. **asyst:Alarm Billing** allows your organization to:

- Issue any number of alarm permits to any number of locations and to have each permit have a unique number of "free" false alarms per year prior to being billed a false alarm fee.
- Send bills for permits and permit renewals.
- Use **asyst:Accounts Receivable** to handle the billing and collection by interfacing directly with **asyst:Accounts Receivable** for AR functions.
- Capture alarm information directly from **asyst:Calls for Service** so that duplicate data entry is avoided.

asyst:Alarm Billing is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the most needs of your organization. The **asyst** family operates in either a single user or a networked PC environment. Despite its ease of use and value pricing, **asyst:Alarm Billing** is packed with features that will make your work life easier and more efficient.
