

BUDGET BILLING[™]

Tomorrow's Integrated Information System

asyst:Budget Billing[™] is an add-on to **asyst:Utility Billing**[™]. Like the rest of the **asyst** product family, **asyst:Budget Billing** looks and works like Microsoft® Office. **asyst:Budget Billing** is one of a comprehensive system of individual applications that can be mixed and matched to meet the most exacting utility billing needs. This Windows-based product family operates in either a single-user or small network PC environment.

asyst:Budget Billing is designed to allow your utility to easily offer a budget (flat) payment option to your customers. It is a great service to offer your utility customers that are on fixed incomes. **asyst:Budget Billing** will automate this process for you. Once a client is set up with a budget contract the system will keep track of the amount under/over the budget plan. The system will bill the budget amount for the length of the contract. Contracts can easily be renewed each year.

Despite its ease of use and value pricing, **asyst:Budget Billing** is packed with features before only available in much more complex and expensive systems:

- Budget amounts are automatically calculated once you set up the contract.
- Contracts can be easily renewed each year.
- Customers on the budget plan will be highlighted with the budget amount in the database.
- Customer that are on your budget plan will not be subject to penalties.
- Contract List provides a list of customer account numbers, names, service addresses, budget bill amounts, and budget bill renewal dates.
- Clients on the Budget list will be noted in reports.
