

BUILDING PERMITS[™]

Tomorrow's Integrated Information System

asyst:Building Permits provides an efficient and accurate system for issuing and maintaining Building Permits throughout the entire construction process. **asyst:Building Permits** allows your organization to:

- Enter and maintain permit applications for a variety of permit types.
- Keep track of the areas and dollar values involved in the project being permitted.
- Assign any number of contractors and contract values to a permit.
- Track the status of each permit.
- Record the inspections required on each permit.
- Enter and maintain the permit fees associated with each permit and the dates on which each is paid.
- Record the necessary inspections, the schedule dates, any necessary re-inspections and the results (including inspection notes) of each inspection.
- Easily create notices and letters with the Microsoft Word mail merge database.
- Easily attach any type of document to the permit database.
- User-defined action codes can be created to track actions on permits.
- Reports can export easily to Microsoft Word and Excel.
- Ability to look up permits by Parcel ID, Owner, Address or Project.

asyst:Building Permits is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the most exact needs of your organization. The **asyst** family operates in either a single user or networked PC environment.

Despite its ease and value pricing, **asyst:Building Permits** is packed with features that will make your work easier, more productive and more efficient.
