

CADTM

Tomorrow's Integrated Information System

asyst:CAD provides an efficient and easy to use system for dispatching officers and units to calls for service.

asyst:CAD is easy to set up and very easy to learn and use. It is designed for the often quick pace of a dispatcher's job, and is visual in nature so that dispatching status and activity can be seen with a glance at the computer's monitor.

asyst:CAD allows your organization to:

- Quickly respond to Calls for Service (interfaces with **asyst:CS**) by dispatching officers or units.
- Keep track of dispatched officers and automatically record dispatch, arrival and cleared times, as well as location.
- Handle multiple shifts on duty at the same time.
- Prioritize calls.
- Assign backup units and officers.
- Handle Quick Add of Calls for Service for field or officer generated calls.

asyst:CAD is part of a comprehensive system of individual **asyst:Public** Safety applications that can be mixed and matched to meet the needs of your organization. The **asyst** family operates in either a single user or networked PC environment. Despite its ease of use and value pricing, **asyst:CAD** is packed with features that will make your work life easier and more efficient.
