

FIXED ASSETS[™]

Tomorrow's Integrated Information System

asyst:Fixed Assets gives you the ability to easily maintain a register of fixed assets that are owned by your organization. Calculate depreciation and create appropriate General Ledger journal entries for depreciation, in addition, **asyst:Fixed Assets** provides your organization with the following functionality in managing your assets:

- Records and monitors capital assets.
- System maintains description, identification, location, age, departmental allocation, original cost, acquisition date, fund source and asset type.
- Tracks the transfer and disposal of assets.
- Eliminates redundant data entry by automating the acquisition of pending fixed assets through integration with **asyst:Accounts Payable**.
- Allows for easy production of asset register.
- Increases accounting control by providing detailed account records of your organization's assets.
- Improves efficiency by automatically calculating depreciation.
- Provides easy access to information with easy search options for assets.
- Easily transfers assets and improvements between locations and departments.
- System provides multiple site defined fields for dates, amounts and comments.

asyst:Fixed Assets is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the most exacting needs of your organization. The **asyst** family operates in either a single user or a networked PC environment. Despite its ease of use and value pricing, **asyst:Fixed Assets** is packed with features guaranteed to make your work life easier and more enjoyable.
