

# HANDHELDS<sup>™</sup>

*Tomorrow's Integrated Information System*

**asyst:HH Meter Interface<sup>™</sup>** provides a quick and easy interface between many electronic reading systems (Hand Held units, radio, satellite) and **asyst:Utility Billing<sup>™</sup>**. **asyst:HH Meter Interface** allows your organization to:

- Choose the electronic reading device you wish to use. **asyst:HH Meter Interface** works with a large and growing number of handheld computers, radio reads and satellite reads systems.
- Easily download customer information, in Meter Book and Route sequence, directly from your PC into your (handheld, radio, satellite) computer in the exact format required. No manual steps!
- Easily upload readings from the (handheld, radio, satellite) computer directly into the **asyst:Utility Billing** database.
- All readings are electronically imported so no manual data entry of readings.

**asyst:HH Meter Interface** is one of a comprehensive system of individual **asyst**<sup>®</sup> applications that can be mixed and matched to meet the most exacting need of your organization. The **asyst** family operates in a single-user or network PC environment. Despite its ease of use and value pricing, **asyst:HH Meter Interface** is packed with features that will make your work life easier and more enjoyable and result in more revenue for your organization.

**asyst:HH Meter Interface** works very well with the Meazura<sup>™</sup> **Hand Held Meter Reading Computers** that are affordable, rugged and easy to use. You don't have to change your meters to add the Meazura<sup>™</sup> option. **Call USTI for the latest prices and information on available options.**
