

# INVENTORY CONTROL<sup>™</sup>

*Tomorrow's Integrated Information System*

**asyst:Inventory Control** provides complete perpetual inventory management and reporting capabilities for any number of stock or non-stock inventory items. It interfaces with **asyst:Purchase Orders**, **asyst:Accounts Payable**, **asyst:General Ledger**, **asyst:Service Orders** and **asyst:Accounts Receivable** and provides complete receipt and disbursement processing between your Central Stores department and both internal and external customers and suppliers. **asyst:Inventory Control** provides the following functions:

- User defined parts types & categories allow you to control the accounting for parts inventory, revenue, and costs.
- Create reorder points and reorder quantities for each item you stock.
- Allows both stock and non-stock items to be inventoried and managed.
- Create non-depleting items to bill for services, fees, fines and other non-physical items.
- Handles multiple warehouses.
- Allows the creation and processing of Return Merchandise Authorizations.
- Automatically generate suggested orders for stock based on actual sales and disbursements, reorder points & lead times and create purchase orders without having to re-key part numbers.
- Bar code labels or regular price labels can be produced by the system to use for sales and/or inventory purposes.
- Extensive reporting is provided to identify fast & slow moving items & frequently ordered items. Inventory status and inventory valuation reports are available by vendor, product type and/or product category. Item profitability is available by item, item type and/or category, salesman, vendor, department, etc.
- Tracks all sales, internal disbursements and customer returns as well as all orders, receipts and returns to and from Vendors.
- Interfaces to **asyst:Accounts Receivable** for billing of depleting and non-depleting items along with automatic updating of inventory balances.
- Interfaces with **asyst:Purchase Order** for order processing, receipting and encumbrance accounting.
- Interfaces with **asyst:General Ledger** for automatic accounting for inventory receipts, disbursements, sales, and returns.
- Interfaces with **asyst:Service Orders** for tracking of inventory items on service order requests.

**asyst:Inventory Control** is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the needs of your local government organization. The **asyst** family of products operates in either a single user or networked PC environment.

Despite its ease of use and value pricing, **asyst:Inventory Control** is packed with features that will help make your work life more efficient.
