

PROPERTY INFORMATION™

Tomorrow's Integrated Information Systems

The Keystone Property Information module offers users a way to link all property-related information in one place. It provides a property-centric base for the Taxation, Building and GIS modules.

- Load the assessment roll provided by MPAC, choosing which fields to update
- Search for properties by roll number, owner name, mailing address, property address or legal description
- Record ownership changes
- Search for previous owners
- Create user-defined activities and events to track all information that is property related and optionally attach photos or other electronic documents
- Use our powerful query tool to search the MPAC roll information for properties meeting specific criteria and generate reports
- Produce roll number labels for all or selected roll numbers
