

# VITAL STATISTICS™

*Tomorrow's Integrated Information Systems*

The Keystone Vital Statistics module allows you to manage all aspects of the registration of births, deaths and marriages. Register births, deaths and marriages and print activity reports as well as many statutory forms.

- Record registrations for births occurring in your municipality
- Birth registrations are stored in a table that is searchable by date of birth, child's last or first name, registration number, registration date, mother's last or first name, father's last or first name, doctor's name or hospital
- Record registrations for deaths occurring in your municipality or elsewhere (where registration is still required in your municipality)
- Produce provincial forms 17, 18 and the burial permit
- Death registrations are stored in a table that is searchable by date of death deceased's last or first name, registration number, registration date, doctor/coroner's name
- Produce a listing of death registrations by funeral director
- Issue marriage licenses and print them on provincial forms
- Marriage licenses issued are stored in a table that is searchable by license number, issued date, applicant's last or first name, co-applicant's last or first name
- This module interfaces directly with the Keystone cash receipts and general ledger modules. Add registration fees collected to deposit batches in cash receipts, print receipts and post them through to the General Ledger.
