

VOTER NOTIFICATION™

Tomorrow's Integrated Information Systems

The Keystone Voter Notification module is a complete election notification software package.

- Import the voters list supplied by MPAC
- Make and track required changes
- Produce reports listing changes made for post-election submission to MPAC
- Produce voters lists and voter notification cards which conform with current legislation
- Track who voted at advanced polls
- Track who voted using alternate voting methods (e.g. – vote by mail) on an ongoing basis and produce up-to-date lists of those who have voted and those who have not at a point in time
