

LAND MANAGEMENT[™]

Tomorrow's Integrated Information System

asyst:Land Management provides a centralized database of property addresses and parcels for any jurisdiction.

- Works with **asyst:General Government** applications to assure consistency of land and address information
- Maintains both zoning and land use information for all parcels.
- Provides a consistent street name index.
- Serves as the hub for managing building permits, code enforcement activities, property tax and business licenses.
- Easily scan any type of documents to the land management database.
- Inquiries available to view all information tied to a land management record such as (property tax, utility billing, building permit, and business license or code violation).

When used with **asyst:Master Directory, asyst:Land Management** provides owner information for all parcels.

asyst:Land Management is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the most needs of your local government organization. The **asyst** family operates in either a single user or networked PC environment. Despite its ease and value pricing, **asyst:Land Management** is packed with features that will help make your work life more organized and hassle-free.
