

MASTER DIRECTORY[™]

Tomorrow's Integrated Information System

asyst:Master Directory provides a centralized database of people and organizations that live in your community or conduct business within your community. This module works as a stand-alone application or in conjunction with one or more of the other **asyst:General Government** applications. It performs the following tasks:

- Works with **asyst:General Government** applications to assure consistency of name information and efficiency in storing information about people and businesses within your community.
- Maintains people, their addresses and a virtually unlimited amount of user-defined data about them.
- Provides a central business database with user-defined types and certifications.
- Stores an unlimited amount of note information about an individual or business.
- Provides, when used with **asyst:Land Management**, consistent owner and occupant information for all parcels.
- Inquiry available by person to view the following information (property tax billing, utility billing, code violations, business licenses, animal license and cemetery management).
- Scan and attach any type of file to the master directory database. **asyst:Master Directory** is part of a comprehensive system of individual **asyst** applications that can be mixed and matched to meet the needs of your local government organization. The **asyst** family operates in either a single user or networked PC environment.

Despite its ease of use and value pricing, **asyst:Master Directory** is packed with features that will help make your work life easier, efficient, and more productive.
