

UCR REPORTS[™]

Tomorrow's Integrated Information System

asyst:UCR Reports is a complete UCR reporting system designed to allow user-defined production of Uniform Crime Reports based on the Federal UCR standards. **asyst:UCR Reports** provides an integrated set of programs and tables that allow you to define the rows of UCR reports and the contents of those rows. **asyst:UCR Reports** provides the following reports:

- **All Federal UCR Reports**
- **Return A**– A monthly report used to collect data on offenses that become known to law enforcement agencies.
- **Supplement to Return A**– A Uniform Crime Report on the nature of the crime and property types associated with it.
- **Page 2 of Supplement to Return A**– A Uniform Crime Report on the value of property broken down by the crimes listed on the Return A.
- **Age, Sex and Race of Arrestees Under 18 Years of Age**– A Uniform Crime Report on the number of arrests and the types of crimes for those individuals under 18. This report breaks the arrests down by offense, age, sex and race.
- **Age, Sex and Race of Arrestees 18 Years of Age and Over**– A Uniform Crime Report on the number of arrests and the types of crimes for those individuals 18 years old and older. This report breaks the arrests down by offense, age, sex and race.
- **Age, Sex and Race of Victims Under 18 Years of Age**– A Uniform Crime Report on the number of victims that are under 18 years old and the types of crimes committed against them. This report breaks the victims down by offense, age, sex and race.
- **Age, Sex and Race of Victims 18 Years of age and Over**– A Uniform Crime Report on the number of victims that are 18 years old and older and the types of crimes committed against them. This report breaks the victims down by offense, age, sex and race.
- **Arrest and Citation Register**– The Arrest and Citation Register reporting system collects information on all adult and juvenile arrests and citations.

The flexibility of **asyst:UCR Reports** allows you to set up the standard UCR Codes for Race, Sex and Ethnicity. In addition, you can tell **asyst:UCR Reports** which standard code to use for White, Black, Indian, Asian, Male, Female, Hispanic/Non-Hispanic and define the user-defined property type code that will be used for a UCR vehicle.

asyst:UCR Reports is part of a comprehensive system of individual **asyst** application that can be mixed and matched to meet the most exacting needs of your organization. The **asyst** family operates in either a single user or networked PC environment. Despite its ease of use and value pricing, **asyst:UCR Reports** is packed with features that will make your work life easier and more efficient.
