

# MASTER NAME INDEX<sup>™</sup>

*Tomorrow's Integrated Information System*

**asyst:Master Name Index** is a feature-filled name indexing product designed to interface seamlessly with and form a core for the remainder of the **asyst:Public Safety** modules. **asyst:Master Name Index** provides an integrated set of programs and tables that allow you to identify any parties in a public safety environment, including complainants, arrestees, suspects, reporting parties and any other user-defined party types.

**asyst:Master Name Index** is highly flexible, with virtually all coded information definable or modifiable by the user. **asyst:Master Name Index** provides a number of valuable functions including:

- Searches the name database by a variety of data fields including Name, Date of Birth, Height\Weight & physical descriptions along with phone numbers, Drivers License and Social Security Number
- Maintains an unlimited number of scars, marks and tattoos
- Maintains unlimited involvement records
- Maintains multiple addresses, including address history and last known address as well as multiple telephone numbers
- Tracks arrest record and fingerprint identification
- FBI, state & local arrest IDs
- Keeps track of all affiliations, including unlimited associates, aliases and narratives
- 3 user-defined alpha-numeric, 3 numeric and 3 date fields
- Unlimited user-defined yes/no flags

**asyst:Master Name Index** allows you to search for names and aliases on:

- SoundX on first, middle and last name
- Race, sex and hair color
- Ranges of DOB, age, height & weight

**asyst:Master Name Index** includes reports that lists summary or detailed data for each name record and juvenile who has reached adulthood. You can use Microsoft Access as a powerful investigative tool for any ad hoc reporting or queries.

**asyst:Master Name Index** is part of a comprehensive system of individual applications that can be mixed and matched to meet the needs of your local government. The **asyst** family operates in either a single user or a networked PC environment. Despite its ease of use and value pricing, **asyst:Master Name Index** is packed with features that will make your work life easier and more enjoyable.
